

Use Zoom

First you are going to need the link and password. THIS you can always find on Google Classroom. Before each Zoom meeting I will post this information.

When you join the Zoom, you should be using your first and last name.

I don't really know most of you, so this would be helpful for getting to know you. Last names are important too because there could be someone with the same first name as you! Do you want them getting the participation points and not you?

If you do join the Zoom without using your first and last name, I will allow you in and you have one minute to identify yourself in the chat, otherwise you will be removed and not allowed in. This is for the safety and security of my other students and it is district policy.

If you are having issues getting into the Zoom, please email me right away! I want to make sure that everyone is able to attend the Zoom meetings.

You will be muted when you enter the Zoom.

Feel free to use your video and mic in breakout sessions. This will also be extremely helpful turning mentoring sessions. I will allow for you to interact with your peers just as you would in a classroom.

Lastly, I am the last to leave the Zoom...always. And the Zoom will not start until I begin the session and approve those in the waiting room, so please be patient.

However, classroom and school rules still apply. ANYTHING inappropriate in the Zoom meetings will be reported to administrators!
